APPENDIX B

MANUAL WEIGHT DETERMINATION FOR BILLING PURPOSES

The following procedure is to be utilized during those periods that the weighing scale and/or the scale computer is not available and computerized tickets cannot be issued at the time of transaction.

- (a) If the scale is operable but the computer is not, MIRA and/or its contractor will handwrite tickets with live scale weights. The handwritten tickets will be entered into the computer at a later time when the computer is operable.
- (b) If the scale is not operable then historical average weights will be used. MIRA and/or its contractor shall keep historical hauling load records for each vehicle or container which has been permitted by MIRA for disposal at Connecticut Solid Waste System facilities. Historical load records shall include all vehicle or container transactions over a reasonable disposal history period.

Historical load records shall be recorded as two (2) averages:

- (b.1) the average load weight (xx.xx Tons) of waste material hauled by each vehicle or container over its disposal history while permitted by MIRA.
- (b.2) the average load weight (xx.xx Tons) of waste material hauled by each vehicle or container during the previous calendar month.

During those periods that the weighing scale is not available, the greater of the two historical load records (b.1 & b.2), for that vehicle or container shall be used to determine the estimated load weight for billing and all other contractual requirements between MIRA and the permittee.

- (c) For those vehicles or containers that have not established a historical record, MIRA shall predetermine estimated load weights to be used until actual load records can be established. A minimum of ten (10) transactions with MIRA by that specific vehicle or container shall constitute an acceptable and approved historical record. Historical records shall become effective as outlined in (b) above. All transactions of this type shall be based on MIRA's predetermined estimated load weight. Predetermined estimated load weights shall be periodically reviewed by MIRA. MIRA shall determine if future predetermined estimated load weights should be adjusted. Transactions prior to the implementation of an adjustment shall not be affected by any adjustments to the predetermined estimated load weights.
- (d) Each weighing transaction requiring the use of historical load records, shall be documented on the weight ticket. This ticket shall be completed by an authorized weight recorder and shall be signed by both the recorder and the deliverer of the waste load.

The information to be recorded on the transaction weight ticket shall be as follows:

Name of the Permit holder (hauler);
Permit number;
Container number (if applicable);
Time;
Date;
Material Type;
Origin;
Signature of Driver; and
Signature of Recorder.
