I. Request for Proposals:

A. Background

The MIRA Dissolution Authority (“the Authority”) was created by an act of the State of Connecticut Legislature (Public Act 23-170) effective July 1, 2023. As a result of this legislation, the Authority replaced the existing Materials Innovation and Recycling Authority (MIRA). The Authority assumed ownership and control of all of MIRA’s assets, as well as MIRA’s statutory duties and responsibilities, and it continues to operate MIRA’s ongoing waste transfer operations until acceptable alternatives become available. The Authority has been charged with supplementary duties and responsibilities related to MIRA’s dissolution.

The Authority is the owner of an approximate 80 acre site encompassing the now shuttered MIRA Resource Recovery Facility and Jet Turbine Facility located in the South Meadows section of Hartford, CT and more specifically identified as 300 Maxim Road and 100 Reserve Road in Hartford (the “South Meadows Site” or “Site”). The Authority’s ownership and control of the Site extends to all Available Equipment and Installed Equipment (collectively “Equipment”) acquired for use in the operation of the Resource Recovery Facility and Jet Turbine Facility and now remaining at the Site. Such Equipment includes, but is not limited to:

- Available Equipment – Including spare parts inventories, fully equipped machine shops, small tools and additional equipment which are depicted on Attachment A-1. These items are presently available to be marketed, auctioned, sold and removed as expeditiously as possible; and
- Installed Equipment - Including, but not limited to, motors, compressors, pumps, cranes and hoists, conveyors, shredders, picking stations, steam and jet turbines, fueling facilities and other equipment, examples of which are depicted on Attachment A-2. These items are to be marketed, auctioned, otherwise sold and removed once disassembled by the Authority’s approved Demolition and Salvage Contractor, or selected buyer, as discussed herein. Items not auctioned or sold, or unsuccessfully auctioned, will be removed by the Authority’s Metals Recycling Contractor to be separately solicited by the Authority.

The Authority’s responsibility to wind down MIRA’s operations and activities in an orderly and responsible manner includes the marketing and sale of its surplus Equipment which the Authority now desires to have marketed, brokered, auctioned, sold and removed from the Site pursuant to this RFP. Additional information on the Authority’s creation and the MIRA dissolution process can be found at <https://www.ctmira.org/>.

Accordingly, the Authority seeks proposals from Equipment marketers, brokers, retailers and similar parties interested in assisting the Authority in the sale and removal of the items specified in **Attachments A-1 and A-2**.

B. Scope of Work
